List of tables

2.1	Summary of milk production statistics since 1998/99	5
2.2	Summary of herd statistics since 1974/75	6
2.3	Summary of herd production since 1974/75	7
2.4	Average production per cow by herd size in 2005/06	9
3.1	Herd analysis by region in 2005/06	11
3.2	Herd production analysis by region in 2005/06	12
3.3	Herd analysis by district in 2005/06	13
3.4	Herd production analysis by district in 2005/06	14
4.1	Trend in the use of herd testing services for the last 20 seasons	16
4.2	Use of herd testing by LIC region in 2005/06	17
4.3	Season herd test averages per cow by LIC region in 2005/06	18
4.4	Trend in the national herd test averages for the last 20 seasons	19
4.5	Monthly herd test averages by LIC region in 2005/06	20
4.6	Herd test breed averages by age of cow in 2005/06	21
4.7	Liveweight by age and breed of cow in 2005/06	22
4.8	Trend in Artificial Breeding use for the last nine seasons by LIC region: cows and yearlings to AB	23
4.9	Economic values used from 18 February 2006	27
4.10	Average Breeding Values and Breeding Worth of 2001 born bulls	28
4.11	Number of sires by birth year and breed	28
4.12	Herd Breeding Worth in 2005/06	29
4.13	Herd Production Worth in 2005/06	29
4.14	Cow Breeding Worth in 2005/06	30
4.15	Cow Production Worth in 2005/06	30
4.16	Average Breeding Worth and Breeding Value of all cows by breed born in 2003	32
4.17	Survivability percentages since 1996/97	32
5.1	Trend in prices received for milksolids for the last 20 seasons	34
5.2	Trend in dairy land sale values for the last 20 years	35
5.3	Mean calving interval	38
5.4	Herd analysis by operating structure in 2005/06	39
5.5	Herd production analysis by operating structure in 2005/06	39
5.6	Trend in the percentage of herds in each operating structure for the last 10 seasons	40
5.7	Trend in the number of herds in each operating structure for the last 10 seasons	40
5.8	Operating structure by region in 2005/06	41
5.9	Operating structure by herd size in 2005/06	41
6.1	Tuberculosis (Tb) testing and results in 2005/06	44

List of graphs

2.1	Trend in the number of herds and average herd size for the last 30 seasons	5
2.2	Trend in milksolids production per cow since 1992/93	8
2.3	Distribution of herds by milksolids production per cow for the last three seasons	8
2.4	Herd size distribution for the last three seasons	9
3.1	Regional distribution of dairy herds in 2005/06	10
4.1	Trend in the percentage of herds testing for the last 30 seasons	17
4.2	Average milkfat and protein production per cow in 2005/06	19
4.3	Liveweight by age and breed of cow in 2005/06	22
4.4	Trend in the percentage of cows to Artificial Breeding for the last 30 seasons	24
4.5	Average number of inseminations per cow for the last 20 seasons	24
4.6	Ayrshire semen usage (%) over cow breed for the last five seasons	25
4.7	Crossbreed semen usage (%) over cow breed for the last five seasons	25
4.8	Jersey semen usage (%) over cow breed for the last five seasons	25
4.9	Holstein-Friesian semen usage (%) over cow breed for the last five seasons	26
4.10	Trend in the percentage of inseminations of each major breed for the last 40 seasons	26
4.11	Genetic trend of proven dairy bulls by year of birth	28
4.12	Distribution of Herd Breeding Worth in 2005/06	29
4.13	Distribution of Herd Production Worth in 2005/06	29
4.14	Distribution of Cow Breeding Worth in 2005/06	30
4.15	Distribution of Cow Production Worth in 2005/06	30
4.16	Trend in Breeding Worth for all cows in 2005/06	31
4.17	Trend in Production Worth for all cows in 2005/06	31
5.1	Trend in milksolids payout to dairy farmers for the last 30 seasons	34
5.2	Trend in dairy land values (price per hectare) for the last 20 years	35
5.3	Breed percentages of cows in each region in 2005/06	36
5.4	Planned start of calving dates for cows (excluding first calvers) by region	37
5.5	Median calving dates for cows (excluding first calvers) by region	37
6.1	Regional distribution of the EBL scheme	43

1. Introduction

As of March 2002, LIC became a user-owned co-operative, with responsibility for farm production activities and, in particular, dairy herd improvement and herd records.

LIC's activities can broadly be described as genetics, information and advice. Services provided to farmers include farm management information, herd testing and artificial breeding services, DNA analysis, a farm advisory service, research to improve farm profitability, statistical information related to the New Zealand dairy industry, and herd recording on the LIC Database.

Dairy Statistics 2005/06 contains many of the dairy industry statistics that were released until 1983/84 in the *New Zealand Dairy Board Farm Production Report*. In 1984/85, with the formation of the Livestock Improvement Division, the report was renamed the *Livestock Improvement Report*. In 1987/88 it was titled Annual Report (Livestock Improvement Division) and, with the establishment of Livestock Improvement Corporation Limited in 1988, the report is now released under the title *Dairy Statistics*.

Source data used for the publication have altered over time. The statistics presented in *Dairy Statistics* from 1992/93 were obtained from dairy companies and from information stored on the LIC Database. Prior to 1991/92, the information for the *Dairy Statistics* publications was obtained primarily from the analysis of the New Zealand Dairy Industry Cow Census (an annual survey of all dairy farmers) last conducted for the 1990/91 season. The 1991/92 edition of *Dairy Statistics* was a transition year for which only minimal data was available.

Since the 2005/06 season, Livestock Improvement has changed its name to LIC. For ease of reading "LIC" is the term used throughout this publication.
